Teladoc Health Viewpoint

Expand access to convenient patient care

The challenges of fragmented care and workforce shortages demand solutions that are always available and integrated with an organization's workflow. Viewpoint software empowers hospital systems with the flexibility to scale access to high-quality, reliable care and extend local and regional coverage by bringing care directly to where patients are. The Viewpoint software is downloadable for Windows PC and iPad iOS environments. Additionally, browser-based video consults through Web Viewpoint transform existing technology into virtual care endpoints.

Transforming care delivery and reach

Teladoc Health offers a fully integrated suite of connected care solutions to help hospitals and health systems of all sizes offer a cost-effective, high-quality telehealth experience to their patient and care providers. Viewpoint is just one part of an enterprise-wide virtual care solution designed to support personalized care in any healthcare environment and harness data analytics through a single platform to support the health of whole communities.

TELADOC HEALTH SUPPORTS THE EXISTING WORKFLOWS OF
600+ hospitals and health systems

Key benefits

Ability to transform existing **Windows or iOS devices** into a telehealth device with a physician

Lower barrier of entry for systems that have already invested in capital equipment to join the Teladoc Health network

Always-on capability ensures ease of use
